

TQ-700

Electric Pump

Compact Design.
Full Sized Productivity.

Optimized Flow Technology

Engineered for Torquing Applications

- Up to 50% faster bolting than competing pumps
- Cooler operation for continuous use and longer life

Fieldwork Ready

Designed for Portability and Protection

- Dry weight starting at 66 lbs.
- Fits through most wind turbine door hatches
- Integrated hoisting point
- Built-in protection for controls and gauge
- IP55 rating for superior dust and water protection

Reliable

Depend on the TQ-700 to Work, Wherever and Whenever you Need it

- Designed for continuous use
- Low amp draw
- Works well with portable generators
- Quiet, low maintenance brushless motor design

TQ-700 Electric Pump

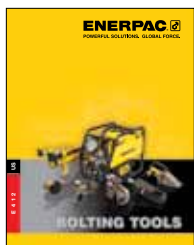

Ideal for Wind Turbine Installation and Maintenance

- Foundation installation and alignment
- Tower, nacelle and blade connections
- Gearbox installation and removal
- Rotor Locking

S & W-Series Hydraulic Wrenches

Tough, durable tools designed for heavy duty performance.

Reliable and repeatable accuracy delivered in a compact, low maintenance tool.

Bolting Solutions

Enerpac's Bolting Tools catalog caters to the complete bolting work-flow, ensuring joint integrity in a variety of applications in joint assembly, controlled tightening and joint separation. High quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.
