

Model 2 (Extra Heavy Duty)

The original portable tools invented in 1928 by Morse-Starrett to cut wire rope. Actuated by striking with a hammer, they are easy to operate and give superior performance without jamming. They are precision-engineered to deliver a clean cut without affecting the original roundness of the wire rope. The blades and dies are made of the finest tool steel available, heat-treated, and ground to close tolerances.

Model 2
1 1/2" capacity

Model 2 (extra heavy duty)
